Activating Manufacturing Spaces: The Role of Mission-Driven Organizations

Presented by the Urban Manufacturing Alliance
Who is the Urban Manufacturing Alliance?

We’re a national coalition of 800 manufacturing practitioners in approximately 200 cities.

By “manufacturing practitioners”, we mean the people and organizations that help manufacturers.

Our mission is to build robust, environmentally sustainable, and inclusive urban manufacturing sectors. We work with our members to do that.
How we do our work:

Four Core Strategies

• Communities of Practice
• Movement Building
• Shaping Policy
• Collaborative Research
