Your Building and Learning Spaces Dreams Came True! Now What?

Three Guiding Questions:

1. How do we build positive working relationships with key stakeholders to align with the university’s strategic plan?

2. Who decides on what type of space is appropriate for teaching and learning?

3. What technology is necessary for effective collaborative and flexible classrooms?

Ready Kit
Prepare a toolbox to facilitate agile responses to building opportunities

People
Strategize ways to build meaningful partnerships for learning space design

Pedagogy
Understand the relationship between technology and pedagogy in 21st century room design

Spaces
Create a faculty development plan for the appropriate use of learning spaces

Technology
Marry educational technology tools, room hardware, and furnishings to pedagogies

UNL Hawks Hall is the new home for the College of Business. The first step of the planning process was to identify strategic partners on campus and existing relationships. The second step was to clarify what services design stakeholders provided, and to place those within the University’s strategic plan. The services list was curated to engender collaboration.

The planned STEM instructional building - a repurposed power plant on the MSU campus. Planning for the building’s learning environment involved an audit of existing research and classroom spaces on campus. Most importantly, planning hinged on conversations between faculty and staff who will teach in the building and architects and design professionals.
